Scientific and Technical Information Center

Requester's Full Name: Alex PADA Examiner #: 78217 Date: 1-24-03
 Art Unit: 3714 Phone Number 308-7135 Serial Number: 09/703171
 Mail Box and Bldg/Room Location: CP2-10D28 Results Format Preferred (circle): PAPER DISK E-MAIL

If more than one search is submitted, please prioritize searches in order of need.

 Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc., if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: Interactive Internet Wagering System

Inventors (please provide full names): Aman Safaei ; Wen Rong Wu

Earliest Priority Filing Date: 10-31-2000

For Sequence Searches Only Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.

~~Sub~~ Real-time online ^{gambling} betting on any kind of race.

Key: must also have ^{website with} search engine & archive so you can search for times, dates, racer (horse, jockey, driver, etc.), locations.

You can search & bet on same Website, ~~placing~~ & Website also offering live odds & live updates.

Sofar, the art he's using is 4 patents on horse racing by Brenner, but these don't include a searchable Website.

STAFF USE ONLY

Alex:

Attached are the results to your request regarding live online betting sites with a search feature.

Because of the large number of hits in all the literature, I printed out information for only those items that appeared at least moderately relevant; titles for the remaining items are attached for your review.

I was surprised that I found so few hits. The best ones appear in the patent literature. I looked at 30 – 40 betting web sites and the only search function I could find was for future events.

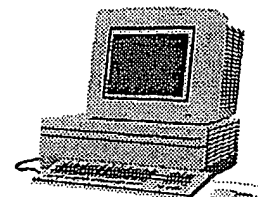

If you'd like this search reworked in any way, please don't hesitate to contact me at 305-8587 or Julie.walko@uspto.gov.

Sincerely,

Julie Walko
CP2 2C08

Voluntary Results Feedback Form

➤ I am an examiner in Workgroup: Example:

➤ Relevant prior art found, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art not found:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Search results were not useful in determining patentability or understanding the invention.

Wagering return data provision method over internet, involves
identifying wagers placed by user that satisfy search parameter
selected by user and calculating corresponding return-on wagers

Patent Assignee: SAFAEI A (SAFA-I); WU W R (WUWR-I)

Inventor: SAFAEI A ; WU W R

Number of Countries: 001 Number of Patents: 001

Patent Family:

Patent No	Kind	Lan Pg	Main IPC	Filing Notes
US 20020077712	A1	38	G06F-155/00	CIP of application US 2000703171

Abstract (Basic): US 20020077712 A1

NOVELTY - The wagers placed by a user that satisfy search
parameter selected by the user are identified and return-on wagers
are calculated. A calculated return data corresponding to return to the
user, is displayed in a user terminal.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is included for
wagering return data providing system.

USE - For providing return data on wagering on horse race over
internet using telephone. Also for other races e.g. dog race, vehicle
race, basketball contest, football contest, golf contest, soccer
contest, hockey contest, tennis contest, jaialai contest, casino game,
game show contest, harness race, bicycle race, etc.

ADVANTAGE - The user is allowed to quantitatively and qualitatively
evaluate wagering process and specific wagering strategy, by
receiving the return data.

DESCRIPTION OF DRAWING(S) - The figure shows a block diagram of the
internet and telephone based wagering system.

Abstract (Basic): WO 200193128 A2

NOVELTY - Interactive services system, comprises: a client connected to receive and respond to signals based on interactive content over a communications channel; an interactive services provider server connected to receive the client responses and respond to the client; an interface page providing information pertinent to the interactive content to the client; and a news information server providing news item according to the responses of the client to the pertinent information.

USE - For web-based mobile telephone betting etc.

ADVANTAGE - Provides a better **betting** window information and the latest information concerning the prospective **wagers**. Moreover, the user interface is designed to provide such information in a manner that both attracts the attention of the better and provides the information in a useful, easy to follow and navigate format in Wireless Application Protocol (WAP) equipped mobile stations. Scrolling news items are **retrieved** from a database based on selections that the user makes in the **interactive** service. The news items are shown to a user one by one. User behavior in the **web** site of the **interactive** service is traced all the time and every move is registered into a log file or database. Every time a subject, sport or team of interest changes, a new set of scrolling news will be fetched and displayed.

DESCRIPTION OF DRAWING(S) - The diagram shows the creation, reception, and response to interactive services

Abstract (Basic): EP 1139245 A1

NOVELTY - Central processing machine has a data feed from financial markets giving both real time data and historical data via a leased line or Internet link. The financial data can be one or more of : market prices; option quotes; interest rates and dividend yields. From the financial data, odds are calculated from estimating the future volatility in the market. Odds are displayed to a user, and payment is made by credit card or E-cash.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are included for

(1) A method of operating a fixed odds betting system.

(2) A computer program for use in running a fixed odds betting system.

USE - Buying and selling fixed odds bets on events in the financial markets.

ADVANTAGE - Enables a bookmaker to efficiently offer a wide range of financial bets to speculators wishing to place relatively small bets without having to employ specialist staff.

DESCRIPTION OF DRAWING(S) - The drawing shows a schematic diagram of the betting system.

Abstract (Basic): WO 200134258 A1

NOVELTY - Information of betting in each round of interactive-analytical games based on sequential disposition of bets is sent over network for display to other players and spectators.

DETAILED DESCRIPTION - The invention relates to the gaming and leisure industry in particular to means and devices for **interactive** -analytical games which are based on the principle of sequential disposition of **bets** on elements taken from the prescribed playing population with analysis of the quantitative distribution of said **bets**. The gaming method involving **bets** is characterized in that the placing **bets** in a new round of the game is started at registration of the first signal with the information about a **bet** after finishing the **previous** round or after the announcement of the start of a game in which, at each iteration of the placing of said **bets**, the signals with information about the quantitative distribution of the **bets** are transmitted through communication channels to the means for displaying the information of a player whose information is treated at this iteration. The invention provides a maximum level of interactivity and/or of informative transparency of the gaming process, thereby improving the level of gaming interest as well as of intellectual and sporting rivalry of the **interactive** -analytical games for the participants and spectators.

An INDEPENDENT CLAIM is included for a device implementing the described method.

USE - Interactive gaming involving bets.

English Abstract

A worldwide lotto game method and system for conducting lottery game sessions based on results of lottery game sessions of official lottery organizations in different countries. The present invention comprises a computerized network for providing real-time results of said official lotteries, a central database for storing said results, an application module (22) for conducting said game sessions accordingly, and communication means for communicating with participants. The present invention further comprises independent financing means for providing the winning participants with the respective prizes. According to the present invention, a method and system is provided for lottery game participants to draw game sessions with the confidentiality that the results cannot be manipulated, but are based on official known organizations games results.

Claim

... policy:

6 The lottery game system in claim I further comprising computing means for calculating **history** game statistics of the official lottery game wherein the computerized **network** application further enable the users to **retrieve** the calculated statistics;

A lottery game method based on at least one official lottery game, implemented within communication **network** application, which is associated to a **gambling history** database and computerized **interactive** game application, said method comprising the steps of:

- i) receiving **real - time** update of official lottery game/s information;
- ii) storing data of at least one official lottery game **history** and current information in the **history** database;
- iii) proposing users to take part in a new lottery game according to pre...

English Abstract

An embodiment of this invention relates to an intelligent lighting device that (108) can receive signals and change the illumination conditions as a result of the received signals. The lighting device can change hue, saturation, and brightness as a response to received signals. One example of using such a lighting device is to display particular colors as a response to certain events. Among others, embodiments may include vehicle lighting systems, an information cube (1300), a backlighting system for a display panel (2000), and an indicator of a condition of a package (2302, 2304).

English Abstract

Method (fig. 2 and 11) and apparatus (fig. 10A) for marketing which employ networked interactive toys (1200). Interactive toys (1200) have real time conversations with users using speech recognition. Interactive toys (1200) are connected to at least one interactive toy server (1208) which is connected to entertainment, education, marketing and sales promotion servers possibly via Internet communication systems (1206) utilizing telephone lines, coaxial cables, satellite or other broadband systems. Interactive toys (1200) are connected to a computing device (1204) such as a home computer, an Interactive Television set-top box or an electronic game station via a wireless link. The interactive toys may support mobile cellular or satellite communication. The interactive toys (1200) provide numerous methodologies for marketing products and services to a user. Interactive toys (1200) may be customized to user requirements by employing a modular design. Content is provided to users for their toys which enables toys to form relationships with users which further enhances entertainment, education, and marketing. Interactive toys (1200) utilize user knowledge bases to match marketing strategies to user histories, behaviors and purchase habits. Content including entertainment, educational and sale promotional content is thus personalized to an individual user. Use of a population or plurality of interactive toys (1200) in methods of marketing to a community of users is employed.

English Abstract

A virtual gaming experience is enabled by using randomly **retrieved** gaming episodes from a pre-recorded episode database. The pre-recorded videos are obtained from **previously** recorded casino security video or from closed regulated tournament video recordings or from computer generated animations. The casino based multimedia source provides audio-video signals depicting various legally-authorized live casino games. An accounting subsystem manages the compensation, credit accounts, and authentication for a virtual player. An **electronic** or mechanical database distribution center connects the multimedia video source and the player accounting subsystem to a virtual player station. The virtual player station includes an appropriately secured display for displaying to the virtual player the multimedia video signal depicting the legally-authorized live casino game or a pre-recorded legally randomized casino game or the artificially generated pre-recorded game. The virtual player station also provides appropriately secured gaming information, which enables the legally authenticated (biometric or otherwise) virtual player to place a game episode outcome **wager**. The virtual player station also provides gaming information to enable the virtual player to receive a payout. Novel simplified **wagering** rules also enable the virtual player to **bet** either for or against the actual player depicted in each of the pre-recorded gaming episodes using either a live casino multimedia video signal or a restricted randomized casino multimedia game video from a pre-recorded storage medium. Pay table related decisions for the simplified **wagering** rules are as simple as video slot **wagering** compared to more complicated casino pay tables for card and other games, such as craps. A virtual player can **concurrently** play several dissimilar casino games with these simplified **wagering** rules at the same player gaming station. When selecting a game, the virtual player can virtually roam around a casino and then participate in a plurality of selected games and purchase casino sponsored E-commerce services and products without leaving the virtual player gaming station.

Claim

... 0 1. A method of providing multimedia signals corresponding to legal ly-authorized virtual distributed, **interactive** casino games, comprising the steps of presenting one or more legally-authorized live casino games played...

...respective one or more legallyauthorized live casino games includes providing multimedia output signals from legallyauthorized, **previously** -recorded, restricted-access games. 103. The method of Claim IO 1 wherein the step of...

...includes providing multimedia signals providing multimedia signals obtained from video recordings that a casino has **previously** recorded on storage media for table games in the casino for surveillance and other regulatory...

...delayed multimedia output signals includes the step of editing the content of the multimedia signals **prior** to distribution. 108. The method of Claim 101 wherein the step of providing multimedia output signals includes providing video signals obtained from video recordings that a casino has **previously** recorded on storage media for the live casino games for surveillance and other t) regulatory a remote player to **wager** on a legally-authorized and regulated real casino games played in a legally-authorized manner...

...player gaming station to establish the remote video player's creditworthiness and age eligibility to **wager** ;
if the remote video player is creditworthy and age eligible, presenting on a C@ 271...

...in a response screen area;
the remote video player selecting the dollar amount of a **wager** ; and
the remote video player signaling that he or she wishes to play the next
...

...and delayed multimedia output signals on a recording 1 5 media. 113. A method of **wagering** on a virtual gaming episode of a legally-authorized virtual distributed **interactive** casino gaming system, comprising the steps of. generating multimedia signals corresponding to legally-authorized real...

...the legally-authorized real casino carries to licensed users at remote player gaming stations having **wagering** equipment enabling remote players to place a **wager** for or against a selected real player depicted by the multimedia signals corresponding to legally...

...played by real players in a legally-authorized gaming casino.
114. The method of **wagering** on a virtual gaming episode of a legally-authorized t@ virtual distributed **interactive** casino gaming system of Claim 113 including the step of enabling remote players to place a **wager** with the casino and against a player depicted by one of the multimedia sources. 115, The method of **wagering** on a virtual gaming episode of a legally-authorized virtual distributed **interactive** casino gaming system of Claim 114 wherein the **wager** is placed on any existing casino game including video **wagering** games. 1 1 6. The method of **wagering** on a virtual gaming episode of a legally-authorized virtual distributed **interactive** casino gaming system of Claim 114 wherein the **wager** is placed on a real player playing a legally-authorized casino game. 1 1 7.

The method of **wagering** on a virtual gaming episode of a legally-authorized virtual distributed **interactive** casino gaming system of Claim 114 wherein the **wager** is placed on a simplified version of a conventional casino game. 118. The method of **wagering** on a virtual gaming episode of a legally-authorized virtual distributed **interactive** gaming system of Claim 114 wherein the **wager** is placed on a real player participating in any game of skill. 119. The method of **wagering** on a virtual gaming episode of a legally-authorized virtual distributed **interactive** casino gaming system of

Claim 114 wherein the **wager** is placed on a real player participating in any crame of chance. I In 120. A method of simplified **wagering** on regulated games presented by a casino, comprising the steps of:
generating a live game...

...a remote player with a presentation of a live game;
the secondary players placing **bets** for or against one or more of the real players; collecting **wagers** from the remote player **prior** to the start of the live game;

completing play of the live game; and
paying the secondary player appropriately for their **wager** on the one or more real players. 121. The method of Claim 120, wherein the...of.
storing a plurality of pre-recorded individually identifiable episodes in an episode database; randomly **retrieving** one or more of the plurality of pre-recorded episodes from the episode data base to provide said session, wherein the random **retrieval** occurs with a predetermined correlation.

125. The method of claim 124 wherein the step of **retrieving** said pre-recorded episode includes pseudo-randomly selecting pre-recorded multim-media gaming episodes, wherein...

...wherein the step of storing includes storing the episode database on one or more random **retrieval** media that is selected from a group consisting of. solid-state memories, optical memories, magnetic...

...probability distribution with a probability of I / E or another probabilistically consistent weighted distribution for **retrieving** any one episode from an episode data base of E episodes. I 38. The method of Claim 126 including **retrieval** of each of the E prestored episodes in the episode database based on an episode...

Filing Language: English

English Abstract

A method and system for providing real time interactive video services through simultaneous reception of a video signal and provision of an interactive application. The method and system allow interactive input from a viewer of the video (102) simultaneously with viewing the video. The method and system also allow an interactive response to the viewer from the interactive application (110). The simultaneous reception of the video signal (120) or broadcast and provision for the interactive application allows services, including dynamically changing conditions associated with the video, to be provided to the viewer (102). For example, real time betting on sports events with dynamically changing wagering conditions can be provided.

International Patent Class: A63F-009/24

Publication Language: English

English Abstract

A gaming system (10) is described which enables parimutuel wagering with instant payoffs on actual events. The system (10), in one embodiment, includes a plurality of wager terminals (18) coupled to a server (12). The wagering terminals (18) are multi-function terminals which enable a patron to enter a wager, provide high quality video/audio game playback, and can issue payments for winners. The game server (12) is a computer system configured to manage the entire game system. For example, the server maintains databases, controls and accounts for the transactions with the wagering terminals (18), controls the flow of data from the

video server (14) to the terminals, collates pools from all sources and computes winnings, and provides detailed statistics for the disbursement of funds. The gaming system (10) also includes a video server interface for providing high speed delivery of the selected video clips from a historical database, and a tote system interface which is coupled to a standard racetrack totalisator system to allow the multi-function wagering terminal to operate as a standard self-service racetrack wagering terminal (18).

Claim

... QUICK TRIFECTA (QT)

(0 Copyright 1999 RaceTech L.L.C. yn

Summary: The QT **bet** requires selection of the first three finishers, in their exact order, for a single contest selected from the **historical** library. The contest from the **historical** library is selected at random before the player enters any selection. After the selections are...

...only the first finisher, he wins the Win QT pool. Any winnings may be collected **instantly**. If a player wins the Trifecta QT three times in a row, then he wins the Carry Over QT pool. **Wager** Amount: Only one dollar (\$ 1) **wagers** are accepted for the QT. Pool Split: After commissions have been deducted from the **wager**, the 1 5 remaining amount is apportioned among four separate pools which have been carried over from **previous** contests played by all players: the Carry Over QT pool (A%), the Trifecta QT pool...

...next winner. D. The Bonus/Minimum QT pool is accumulated from the designated percentage of **wagers** and from the pricing round-off, as described below. Trifecta QT Winner: If a player...amounts is paid, a bonus/Minimum QT pool is accumulated from the designated percent of **wagers**, and from the pricing round-off. Each time one of the guaranteed minimum amounts is...

...QT pools, plus any positive amount in the Bonus/Minimum QT pool, and no more **bets** will be accepted.

...game requires selection of the first three finishers for a single race selected from the **historical** library. The race from the **historical** library is selected at random before the player enters any selection. The player may examine...

...the first three finishers in one of seven different ways. Any winnings may be collected **instantly**. A player must risk a second unit **bet** in the **wager** to qualify for the highest value pool. **Wager** Amount: At machines marked "\$1 Per Play" one dollar (\$ 1) unit **bets** 1 5 are accepted. At machines marked "25 0 Per Play" twenty-five cent (\$0.25) unit **bets** are accepted. The player may enter only one or two unit **bets** per play.

... betting turnover. Net profits were around 2%.
In 1996 a friend introduced Blandford to the **Web**. The field was wide open; big U.K. houses had too much tied up in their High Street **betting** outlets to risk cannibalizing themselves with **Web** sites. So Blandford sold his small chain for \$825,000 and, with a partner, ponied up \$330,000 and set about designing **Internet** software that could handle a bookmaker's risk monitoring, such as **instantly retrieving** a customer's **betting history**.
They picked up one of only three Internet betting licenses from Alderney, just as the...
